## Experiment 1

Theme used for every small multiple created

### Demographics

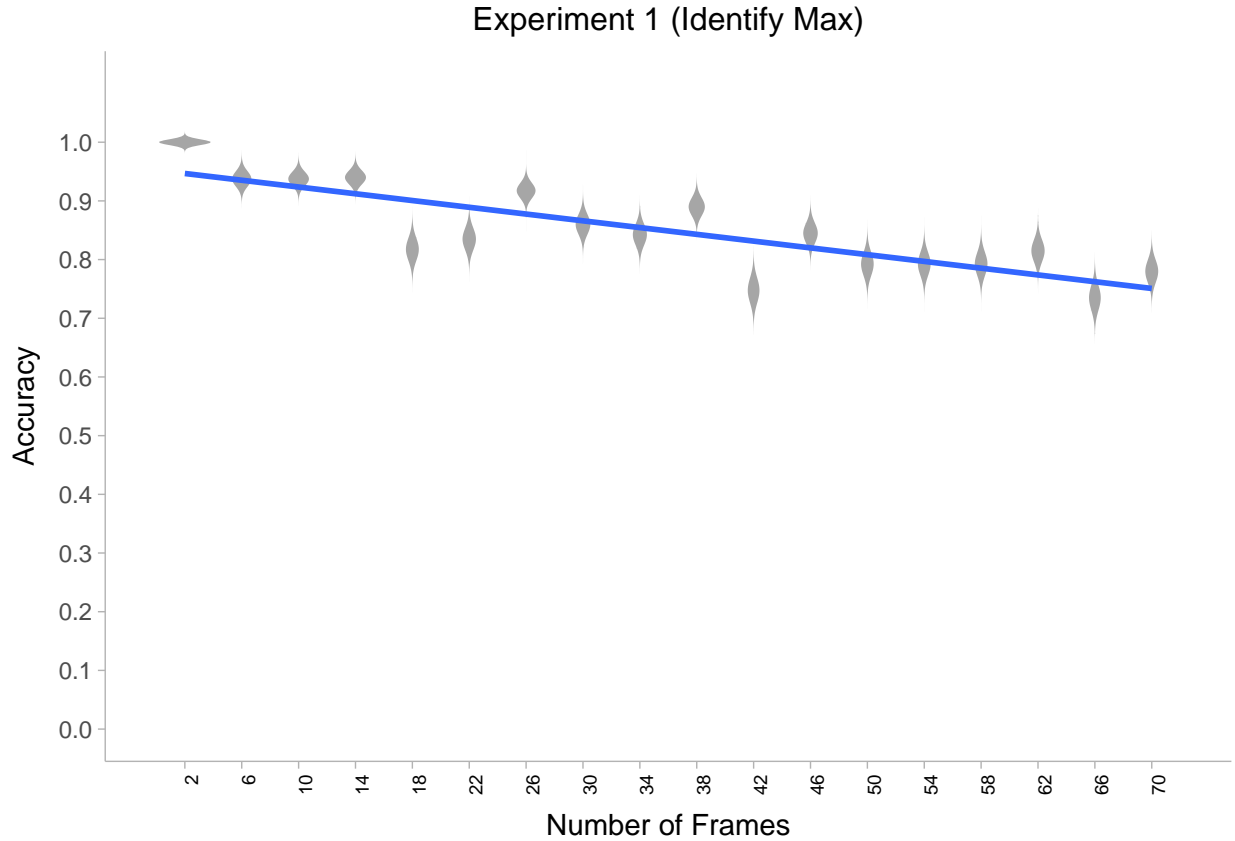

There were 141 participants in Experiments 1. There were 71 participants who selected Male, 65 participants who selected Female, 4 participants who selected Non-binary / third gender, and 1 who selected Prefer not to say.

the mean age is 33.62 (SD = 11.79).

### Identify 3 Accuracy Analysis

We have a problem Trial for 18 frames - trial 12 (letter N) frame 14 is visually not over the dotted line at 79.5, but the value is 79.507. We are marking this as not a correct response.

```

## Experiment 2

### Demographics

There were 360 participants in Experiment 2. There were 171 participants who selected Male, 174 participants who selected Female, 10 participants who selected Non-binary/Third gender, and 2 who selected Prefer not to Say.

the mean age is 25.64 (SD = 15.4).
